# PORTFOLIO OF WORK

---

Waste & Recycling Equipment

Here at ***KK Hydraulics*** we specialise in the supply of, or repair and refurbishment of static and portable compactors, balers and other waste management equipment. We also repair and offer maintenance contracts for all makes of equipment and operate a 24hour call-out service.

To repair and refurbish equipment, we take units in their original state, strip them down fully, steam wash, shot-blast-prime and paint them according to the customer's colour specification. We rewire and replace all safety switches etc, rebuild hydraulic power packs and re-hose where required.

All the above work is completed in-house, but we can also carry out these works on site if required. Works usually take 3-4 Days.

Some of our clients include Kerry, Cork and Tipperary County Councils, pharmaceutical companies, Supervalu Musgraves etc.

Below, some examples of previous work we have carried out for clients throughout the country and in the UK can be seen.

For further information on waste management and the services we provide please contact Jakes Kelly on (087) 2606374 or [jakes@kkhydraulics.ie](mailto:jakes@kkhydraulics.ie).

Our website [www.kkhydraulics.ie](http://www.kkhydraulics.ie) or Facebook page KK Recycling Equipment shows more options.

Here are some examples of a new compactor supplied by KK Hydraulics.
